Let's Play and Learn!

Match pictures to letters

Draw a line to connect the animals and plants with the first letter of their name. Remember, these are Kashmiri words.

G

K

S

Did you know? Animals don't read or write but instead communicate using smells, sounds, and body movement. But some animals, such as apes and gray parrots can be trained to use human sign language! Do you know how to say "hello" in sign language?

Can you listen to a bird singing around your home or school? Can you use letters to describe the sound? For example, the Satut or hoopoe bird makes a ooop-ooop-ooop sound!

Colouring activity

Do you know what is the insect shown in this drawing and what it is called in Kashmiri? (Hint: The name starts with P!)
