

Rain Bingo!

Rains often bring new experiences and surprises. What can we see and experience around us during the rains? Look out from your window or take a walk around your neighborhood- find any 3 down or across and say Bingo!

Tip: No need for a print out!
Draw and number it for yourself on a piece of paper!

Time to be creative!

Observe dragonflies and damselflies and note down colours and patterns on their bodies, where you found them and how they move. Dragonflies and Damselflies have big compound eyes (made up of many small simple eyes like ours that work together). They help these insects see all around!

If you were a dragonfly/damselfly what would you see with your compound eyes? Draw and describe the world you see.
